PATHWAY: Cellulose degradation.
SIMILARITY: BELONGS TO CELLULASE FAMILY E (FAMILY 9 OF GLYCOSYL
HYDROLASES).
SIMILARITY: Contains 1 fibronectin type III domain.
SIMILARITY: Contains 1 fungal-type cellulose-binding (CBD) doma:
         ENDOGLUCANASE E-4.
FIBROMECTIN TYPE-III.

CC -!- FUNCTION: THE BIOLOGICAL CONVERSION OF CELLULOSE TO GLUCOSE

CC GENERALLY REQUIRES THREE TYPES OF HYDROLYTIC ENZYMES:

CC (1) ENDOGLUCANASSES WHICH THE DISSACCHARIDE CELLOBIOSE

CC (2) EXOCELLOBIOHYDROLASES THAT CUT THE DISSACCHARIDE CELLOBIOSE

CC (2) EXOCELLOBIOHYDROLASES THAT CUT THE DISSACCHARIDE CELLOBIOSE

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (1) ENDOGLUCAN SESS WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZE THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZES THE CELLOBIOSE AND OTHER

CC (4) BETA-1,4-GLUCOSIDASES WHICH HYDROLYZES THE CELLOBIOSE AND OTHER

CC (3) BETA-1,4-GLUCOSIDASE WHICH HYDROLYZES THE CELLOBIOSE AND OTHER

CC (4) BETA-1,4-GLUCOSIDASE WHICH HYDROLYZES THE CELLOBIOSE AND OTHER

CC (5) BETA-1,4-GLUCOSIDASE WHICH HYDROLYZES THE CELLOBIOSE AND OTHER

CC (4) BETA-1,4-GLUCOSIDASE WHICH HYDROLYZES THE CELLOBIOSE

AND OTHER

CC (5) BETA-1,4-GLUCOSIDASES THAT CUT THE DISSACCHARIDE AND OTHER

CC (4) ENCOCELLAR THE BELONGE THE CELLOBIOSE THE CATALYTIC DOMAIN.

CC (1) SIMILARITY: CONTAIN 3 EECOND CBD IN THE CATALYTIC DOMAIN.

CC (1) SIMILARITY: CONTAIN 3 EECOND CBD IN THE CATALYTIC DOMAIN.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      This CDS clone is a part of a collection of human full length expression clones generated by BD Biosciences Clontech and the Harvard Institute of Proteomics. Each CDS has been cloned in two forms: with and without stop-codon (to allow fusion with C-terminal tag). The CDS has been directionally cloned using BD In-Fusion(TM) cloning system between the SalI and HindIII sites of the pDNR-DUAL vector. Additional sequences in the clone: 'ACC' after SalI site and before 'ATG' to provide Kozak consensus sequence; 'GG' after last codon and before HindIII site to maintain reading frame. Clone distribution: http://bioinfo.clontech.com/orfclones.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      2 (bases 1 to 1986)
